Squid Game - rated 15+

Squid Game is a Netflix show about a group of people competing against each other in a series of childhood games which get progressively more disturbing. It currently has an age rating of 15+ as the visual content includes high level of gore, death, violence and physical assault.

Children may know about Squid Game through social media and gaming platforms but may not be aware of the violent nature of the program. Promotional images of the show appear childlike but please be vigilant and ensure viewing restrictions are in place on all streaming devices.

Chatting online

Primary-age children may not have previously had much experience with video chatting apps such as zoom, FaceTime and Skype, but may well be using them now for education or to keep in touch with family and friends.

To make sure your child has a positive experience video chatting online, read this guide for parents and carers

Online gaming

Online games are social activities, and most have features that allow children to chat with others whilst they play.

For information about the positives of gaming, the risks of in-game chat and measures you can take to help protect them, watch this short video:

In-game chat: a guide for parents and carers

More information?

Thinkuknow is the education programme from the National Crime Agency's Child Protection Command CEOP (NCA-CEOP) whose aim is to protect children and young people from sexual abuse online.

For more information, advice and guidance, visit their parents website and download their home activity worksheets for fun, online safety activities to do with your family.

Steps you can take to help keep your child safer online

Make sure they know where to go for support: Remind your child they can always speak to you or an adult they trust if anything happens online that makes them feel worried or upset. For a breakdown of report services, visit: Supporting your child with reporting unwanted content online

Talk about how their online actions affect others: If your child is engaging with others online, remind them to consider how someone else might feel before they post or share something. If they are considering sharing a photo/video of somebody else, they should always ask permission first.

Use 'SafeSearch': Most web search engines will have a 'SafeSearch' function, which will allow you to limit the content your child can access whilst online. Look out for the 'Settings' button on your web browser homepage, which is often shaped like a small cog.
